

## Screen & Stencil Printers

Economic printers for solder paste application using either metal stencils or mesh screens. The set up of the printer is easy with precise X-Y and theta adjustment. There is also ample height adjustment to allow for different substrate thickness. Quick release frame clamping screws allow for easy and fast exchange of frames. The rigid construction means trouble-free and consistent printing.

### SAM 1515

Standard frame: Inside size 17.5" x 14.5" (444mm x 368mm)  
OD size 20" x 17" (508mm x 432mm)

Gas piston stay for easy operation.

Screen height adjustable 0-20mm  
Flat Aluminium base plate 18.5" x 14.5" (470 x 368mm)  
Manual 9" rubber squeegee  
Weight 13.4kgs  
Overall dimensions including control knobs,  
22" x 23" x 10" (559mm x 584mm x 254mm)

### SAM 2420

Frame inside size 25.5" x 24" (650mm x 610mm)
